

Plumbing Newsflash

Plumbing and draining licenses Adoption of a common licence renewal date

Purpose

The purpose of this Newsflash is to advise of the adoption of a common licence renewal date for all plumbers and drainers licences.

Background

At the Plumbers and Drainers Board meeting held 6 February 2008, the Board considered the administrative and monitoring advantages of introducing a common renewal date for all occupational licences. As a result the Board resolved to adopt a common licence renewal date of 31 March.

Application

As a consequence of this decision, a small once only adjustment to the amount needed to pay for a new licence may be required. Licence renewal payments will require an additional pro-rata payment on top of the usual fee to cover the extra days that are needed to move all licence renewal dates to 31 March 2009.

In advance of a licensee's current renewal date, licensees will receive a renewal form and an accompanying letter in the mail advising of the pro-rata amount to be paid.

Licences may still be renewed for periods between 1 and 5 years. The licence fees for these periods have not been changed.
