EXAMPLE CALCULATION

A	B	C	D	E
Description of goods obtained from overseas	Cost free on board at overseas port from which despatched \$AUD	Duty payable expressed as a percentage of the Column B cost	Duty Payable (Column B multiplied by Column C percentage) \$AUD	Total included in Tender (Column B + Column D) \$AUD
Chiller	\$100,000	10%	\$10,000	\$110,000

Exchange rate on the date the Managing Contractor's GCS Offer was submitted AUD\$1 = £0.3800

Exchange rate as applied at the time of payment of the invoice by the Managing Contractor AUD\$1 = £0.4200.

Duty paid at the time of payment of the invoice by the Managing Contractor = 15%

The Calculation

- Adjustment to GCS for variation in rates of exchange for and the goods = $\frac{0.3800 - 0.4200}{0.4200} \times \$100,000$ = (\$9,523.81)
- Adjustment to GCS for variation in duty = $((\$100,000 - \$9,523.81) \times 15\%) - \$10,000$ = \$3,571.43
- Hence the total adjustment to the GCS in relation to the Chiller = $(\$9,523.81) + \$3,571.43$ = (\$5,952.38)

2. a time for Practical Completion;
3. documentation identifying the design upon which the Guaranteed Construction Sum is based, including a revised Project Brief whereby any changes from the original Project Brief are clearly shown;
4. an elemental cost plan in accordance with the Australian Institute of Quantity Surveyors' Australian Cost Management Manual 2000 Volume 1, Appendix A1;
5. the Managing Contractor's proposed trade package break up and budget for each trade package, including without limitation details of any preferred subcontractors for particular trade packages and such further information as may be reasonably required by the Principal or the Principal's Representative.
6. List of Performance Warranties to be obtained from suppliers or manufacturers as per Clause 12.4 of the Conditions of Contract.

SCHEDULE 15 – Activities to be Carried out during Stage One

Clause 3

Guide note: Delete this guide note

Project Team to include activities as appropriate. The following is a guide only and may not be applicable for the specific project.

1. It is expected that, during Stage One, the Managing Contractor will:
 - a. work with the Principal and the Principal's consultants (if any) in a cooperative and collaborative manner;
 - b. demonstrate an open and transparent approach to the sharing of information;
 - c. provide information to the Principal in a timely manner; and
 - d. act in good faith.

2. The Managing Contractor shall manage the design and costing process during Stage One, including but not limited to carrying out the following activities:

- a. DESIGN MANAGEMENT AND DELIVERY

The Managing Contractor will be responsible for managing all aspects of the design process. The process will include:

- Managing the design consultants and the design process;
- Facilitating value management workshops as necessary;
- Providing expert advice on buildability and staging issues;
- Chairing and minuting design meetings and produce monthly status reports to the Principal; and
- Managing the design of the Works so that the Works as designed can be constructed within the Principal's Project Construction Cost Estimate.

As part of the above process the Managing Contractor will be required to prepare a Project Design Plan (PDP) which will include the following:

- Flowchart of design process;
- Documentation requirements;
- Identification of roles and responsibilities;
- Nomination of design meetings including attendees, frequency, location, and agenda;
- Description of design management and cost planning procedures;
- Proposed control of non-performance;
- Format of monthly reports.

- b. CONSTRUCTION PLANNING

As part of the design process the Managing Contractor will be required to prepare a site- specific staging and management plan for the project during construction. In addition to a detailed staging plan for the Works, the

plan will include guidelines on the implementation of goals relating to time, cost, communications, security, procurement, risk assessment, reporting, quality, safety, and the environment.

c. COST PLANNING

Cost planning is an integral part of the design process and is used to constantly review costs against budgets. The Managing Contractor is required to manage and coordinate all aspects of the cost planning process to ensure that the cost plan is continuously updated and is aligned at all times with the Principal's Project Construction Cost Estimate as provided in the Project Brief.

The Managing Contractor is responsible for ensuring that the Works to be constructed in accordance with the Contract can be constructed within the Principal's Project Construction Cost Estimate and the Guaranteed Construction Sum included in the Managing Contractor's GCS Offer must be no higher than the Principal's Project Construction Cost Estimate.

As part of its cost planning obligations, within 3 weeks of the Date of Acceptance of Tender, the Managing Contractor is required to submit for the Principal's review, a priced cost plan (the 'initial cost plan'), in a format provided by the Principal's Representative or to be agreed by the parties, setting out the initial estimated construction costs for the Works. The Managing Contractor's cost plan will form the basis for the fortnightly cost planning reviews to be carried out during Stage One.

Following submission of the Managing Contractor's initial cost plan, the Managing Contractor is required on a fortnightly basis, to undertake a review, with the Principal's quantity surveyor or nominee, as to the progress of the Stage One obligations and the alignment of the progressive design of the Works with the Project Construction Cost Estimate, ensuring that the Guaranteed Construction Sum to be included in the Managing Contractor's GCS Offer will not be greater than the Project Construction Cost Estimate.

The Managing Contractor must submit a report to the Principal ('cost plan report'), within 2 business days of the review, detailing the outcomes of the review undertaken including an analysis of the design of the Works in comparison to the Project Construction Cost Estimate and the expected Guaranteed Construction Sum figure as at that time. Any failure by the Managing Contractor to provide the initial cost plan or the fortnightly cost plan report during Stage One will constitute a substantial breach of contract.

Where the Managing Contractor seeks trade package market testing, the detailed cost break ups of individual trades tested shall be provided to the Principal when received by the Managing Contractor.

d. TIME MANAGEMENT AND PROGRAMMING

Whilst an indicative program has been prepared it is intended as a preliminary guide only.

The Managing Contractor will be required to prepare a detailed program for the design stages of the project and, based on the best information available, a draft program to completion of construction including proposed staging of the works.

The Managing Contractor will work closely with the Principal when formulating the proposed time for completion of the project and if a different time is proposed to the Principal's estimated time for completion contained in the Project Brief, the Managing Contractor must demonstrate reasons for such difference.

The Managing Contractor will be responsible for managing the design process to ensure adherence to the agreed program including:

- Monitoring actual performance against planned achievement, and
- Taking corrective action as necessary to achieve agreed objectives.

e. VALUE ADDING

The Managing Contractor is expected to participate in and/or undertake a variety of "value-adding" activities (such as conducting value management workshops).

3. The Managing Contractor shall undertake any Early Works Packages directed by the Principal's Representative under the Contract.
