Subject: ethanol mandate idea

The idea is a nonsense !
Why?
The EROEI is a negative !
What does that mean?

It means you start with a 100 units of energy and end up with about 50 units of ethanol energy !

The ROI is a negative !
What does that mean?

It means that without a government subsidy, the ethanol industry would collapse like selling a product that costs you \$100 for \$50 ...time after time ...
